1 Preface and Safety

Yaskawa manufactures products used as components in a wide variety of industrial systems and equipment. The selection and application of Yaskawa products remain the responsibility of the equipment manufacturer or end user. Yaskawa accepts no responsibility for the way its products are incorporated into the final system design. Under no circumstances should any Yaskawa product be incorporated into any product or design as the exclusive or sole safety control. Without exception, all controls should be designed to detect faults dynamically and fail safely under all circumstances. All systems or equipment designed to incorporate a product manufactured by Yaskawa must be supplied to the end user with appropriate warnings and instructions as to the safe use and operation of that part. Any warnings provided by Yaskawa must be promptly provided to the end user. Yaskawa offers an express warranty only as to the quality of its products in conforming to standards and specifications published in the Yaskawa manual. NO OTHER WARRANTY, EXPRESS OR IMPLIED, IS OFFERED. Yaskawa assumes no liability for any personal injury, property damage, losses, or claims arising from misapplication of its products.

Applicable Documentation

The following manuals are available for the J1000 and V1000 Drives:

	11000 Series AC Drive Quick Start Guide				
a summer by store (a	Read this manual first. This guide contains basic information required to install and wire the drive. This guide provides basic programming and simple setup and adjustment. Refer to the J1000 Technical Manual for complete descriptions of drive features and functions.				
	V1000 Series AC Drive Quick Start Guide				
	Read this manual first. This guide contains basic information required to install and wire the drive. This guide provides basic programming and simple setup and adjustment. Refer to the V1000 Technical Manual for complete descriptions of drive features and functions.				

2 General Safety

Supplemental Safety Information

Read and understand this manual before installing, operating, or servicing this option. The option must be installed according to this manual and local codes.

The following conventions are used to indicate safety messages in this manual. Failure to heed these messages could result in serious or possibly even fatal injury or damage to the products or to related equipment and systems.

General Precautions

- The diagrams in this manual may be indicated without covers or safety shields to show details. Replace the covers or shields before operating the drive and run the drive according to the instructions described in this manual.
- Any illustrations, photographs, or examples used in this manual are provided as examples only and may not apply to all products to which this manual is applicable.
- The products and specifications described in this manual or the content and presentation of the manual may be changed without notice to improve the product and/or the manual.
- When ordering a new copy of the manual due to damage or loss, contact your Yaskawa representative or the nearest Yaskawa sales office and provide the manual number shown on the front cover.
- Order a replacement from your Yaskawa representative or the nearest Yaskawa sales office if nameplate becomes worn or damaged.

Read and understand this manual before installing, operating or servicing this drive. The drive must be installed according to this manual and local codes.

The following conventions are used to indicate safety messages in this manual. Failure to heed these messages could result in serious or fatal injury or damage to the products or to related equipment and systems.

Indicates a hazardous situation, which, if not avoided, will result in death or serious injury.

A WARNING

Indicates a hazardous situation, which, if not avoided, could result in death or serious injury.

WARNING! may also be indicated by a bold key word embedded in the text followed by an italicized safety message.

ACAUTION

Indicates a hazardous situation, which, if not avoided, could result in minor or moderate injury.

CAUTION! may also be indicated by a bold key word embedded in the text followed by an italicized safety message.

NOTICE

Indicates a property damage message.

NOTICE: may also be indicated by a bold key word embedded in the text followed by an italicized safety message.

Safety Messages

A DANGER

Electrical Shock Hazard

Do not connect or disconnect wiring while the power is on.

Failure to comply will result in death or serious injury.

Before installing the option, disconnect all power to the drive. The internal capacitor remains charged even after the power supply is turned off. The charge indicator LED will extinguish when the DC bus voltage is below 50 Vdc. To prevent electric shock, wait at least five minutes after all indicators are off and measure the DC bus voltage level to confirm safe level.

Electrical Shock Hazard

Do not operate equipment with covers removed.

Failure to comply could result in death or serious injury.

The diagrams in this section may show drives without covers or safety shields to show details. Be sure to reinstall covers or shields before operating the drives and run the drives according to the instructions described in this manual.

Do not remove covers or touch circuit boards while the power is on.

Failure to comply could result in death or serious injury.

Do not allow unqualified personnel to use equipment.

Failure to comply could result in death or serious injury.

Installation, maintenance, inspection, and servicing must be performed only by authorized personnel familiar with installation, adjustment, and maintenance of this product.

Do not touch any terminals before the capacitors have fully discharged.

Failure to comply could result in death or serious injury.

Before installing the option, disconnect all power to the drive. The internal capacitor remains charged even after the power supply is turned off. The charge indicator LED will extinguish when the DC bus voltage is below 50 Vdc. To prevent electric shock, wait at least five minutes after all indicators are off and measure the DC bus voltage level to confirm safe level.

Do not use damaged wires, stress the wiring, or damage the wire insulation.

Failure to comply could result in death or serious injury.

Fire Hazard

Tighten all terminal screws to the specified tightening torque.

Loose electrical connections could result in death or serious injury by fire due to overheating of electrical connections.

NOTICE

Observe proper electrostatic discharge procedures (ESD) when handling the drive and circuit boards.

Failure to comply may result in ESD damage to the drive circuitry.

Do not use unshielded cable for control wiring.

Failure to comply may cause electrical interference resulting in poor system performance. Use shielded, twisted-pair wires and ground the shield to the designated shield ground location.

Check all the wiring to ensure that all connections are correct after installing the option and connecting any other devices.

Failure to comply could result in damage to the option.

3 About this Option

The installation of the External Heatsink Mounting Kit to V1000 or J1000 AC drives allows the drive heatsink, a major heat generating component of the drive, to protrude to the exterior of a customer supplied enclosure. Large amounts of heat that would normally be trapped inside the enclosure, are dissipated outside the enclosure, thus facilitating a more compact and less costly enclosure selection. Mounting attachments to secure the drive within a panel cutout are supplied. A convective back plate, mounted to the backside of the heatsink, is supplied with certain kits to improve natural convection air flow over the heatsink.

This option may be used when the installation environment conforms to the specifications in *Table 1*.

Installation Environment

Install the drive in an environment matching these specifications to help prolong the optimum performance life of the drive. **Table 1 Installation Environment**

Environment Conditions		
Installation Area	Indoors	
Ambient Temperature	IP20/NEMA Type 1 enclosure: -10 °C to +40 °C (14 °F to 104 °F) IP20/IP00 Open-Chassis enclosure: -10 °C to +50 °C (14 °F to 122 °F) Finless Type: IP20/IP00 enclosure: -10 °C to +50 °C (14 °F to 122 °F) NEMA Type 4X/IP66 enclosure: -10 °C to +40 °C (14 °F to 104 °F) Drive reliability improves in environments without wide temperature fluctuations. When using an enclosure panel, install a cooling fan or air conditioner in the area to ensure that the air temperature inside the enclosure does not exceed the specified levels. Do not allow ice to develop on the drive.	
Humidity	95% RH or less and free of condensation	
Storage Temperature	-20 °C to +60 °C (-4 °F to +104 °F)	
Surrounding Area	Install the drive in an area free from: • oil mist and dust • metal shavings, oil, water or other foreign materials • radioactive materials • combustible materials (e.g., wood) • harmful gases and liquids • excessive vibration • chlorides • direct sunlight	
Altitude		
Vibration	10 to 20 Hz at 9.8 m/s ² 20 to 55 Hz at 5.9 m/s ²	
Orientation	Install the drive vertically to maintain maximum cooling effects.	

Table 2 Installation Environment

Environment	Conditions
Installation Area	Indoors
Ambient Temperature	IP20/NEMA Type 1 enclosure: -10 °C to +40 °C (14 °F to 104 °F) IP20/IP00 Open-Chassis enclosure: -10 °C to +50 °C (14 °F to 122 °F) Finless Type: IP20/IP00 enclosure: -10 °C to +50 °C (14 °F to 122 °F) NEMA Type 4X/IP66 enclosure: -10 °C to +40 °C (14 °F to 104 °F) Drive reliability improves in environments without wide temperature fluctuations. When using an enclosure panel, install a cooling fan or air conditioner in the area to ensure that the air temperature inside the enclosure does not exceed the specified levels. Do not allow ice to develop on the drive.
Humidity	95% RH or less and free of condensation
Storage Temperature	-20 °C to +60 °C (-4 °F to +104 °F)

3 About this Option

Environment	Conditions	
Surrounding Area	Install the drive in an area free from: • oil mist and dust • metal shavings, oil, water or other foreign materials • radioactive materials • combustible materials (e.g., wood) • harmful gases and liquids • excessive vibration • chlorides • direct sunlight	
Altitude		
Vibration	10 to 20 Hz at 9.8 m/s ² 20 to 55 Hz at 5.9 m/s ²	
Orientation	Install the drive vertically to maintain maximum cooling effects.	

NOTICE: Prevent foreign matter such as metal shavings and wire clippings from falling into the drive during installation. Failure to comply could result in damage to the drive. Place a temporary cover over the top of the drive during installation. Remove the temporary cover before drive start-up, as the cover will reduce ventilation and cause the drive to overheat.

4 External Heatsink Option Installation Procedure

Drive Dimensions with External Heatsink Option Installed

This section provides figures and tables of drive dimensions with the External Heatsink Option installed.

Series	Drive Model Number	Reference

External Heatsink Option Installation Procedures

Procedure 1 (Enclosure: IP20)

- 1. Remove the front cover according to the drive instruction manual.
- 2. Mount Attachment A to the standard drive mounting legs using the associated M4×10 pan-head screws.
- 3. Mount Attachment B (2 units) to Attachment A with the associated M4×10 pan-head screws as shown in *Figure 3*.
- 4. Reattach the front cover according to the drive instruction manual.

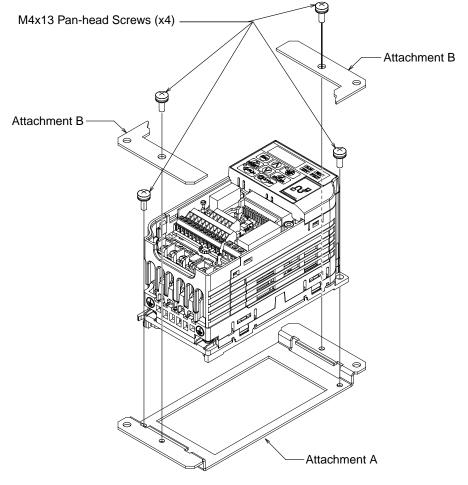

Figure 3 Procedure 1 Diagram (Example Model: CIMR-VD2D0001)

■ Procedure 2 (Enclosure: IP20)

- 1. Remove the front cover according to the drive instruction manual.
- 2. Mount Attachment A (2 units) to the standard inverter mounting legs using the associated M4×10 pan-head screws.
- 3. Mount Attachment B (2 units) to Attachment A with the associated M4×10 pan-head screws as shown in *Figure 4*.
- 4. Reattach the front cover according to the drive instruction manual.

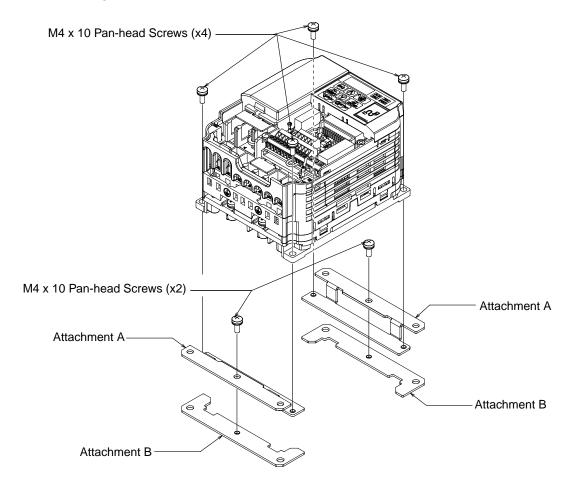

Figure 4 Procedure 2 Diagram (Example Model: CIMR-V□4□0001)

Procedure 3 (Enclosure: IP20)

 Mount Attachment A (2 each) to the mounting holes on the side of the heatsink using the M4×10 pan-head screws. M4 x 10 Pan-head Screws (x2)

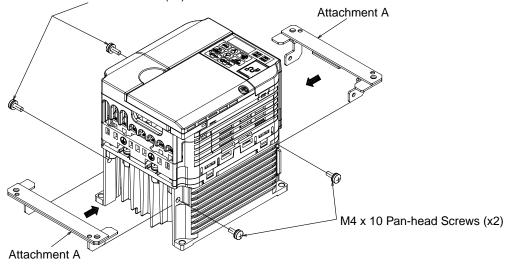

Figure 5 Procedure 3 Diagram (Example Model CIMR-VD2D0010)

Procedure 4 (Enclosure: IP20)

1. Mount the Convective Back Plate to the mounting holes on underside of the heatsink using M4×10 pan-head screws.

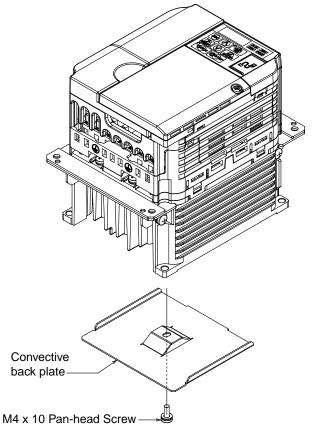

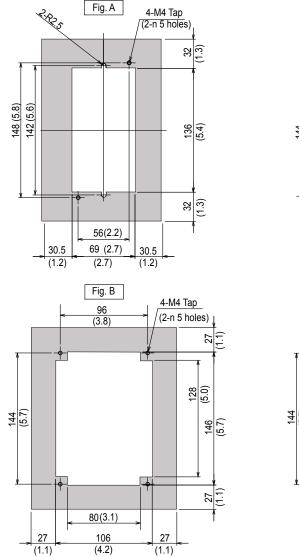

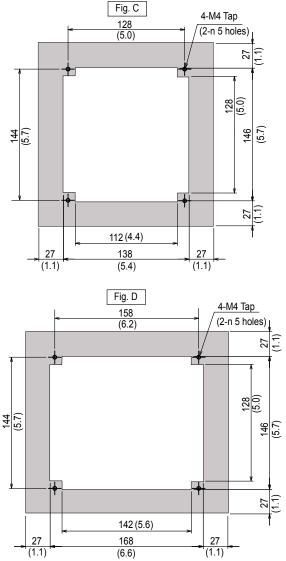

Figure 6 Procedure 4 Diagram (Example Model: CIMR-VD2D0010)

Panel Cutout Dimensions and Optional Gasket (Procedures 1 to 4)

Refer to *Table 9* on page *21* to determine the appropriate Panel Cutout and Gasket Drawing below (Fig. A, B, C, or D) for your specific drive model.

Optional Gasket or Sealant (Procedures 1 to 4)

Note: Gasket or sealant is customer supplied.

If an undesirable air gap exists between Attachment A, B and the drive, attach a CR-Series or EPDM-Series gasket to the mounting panel surface or apply sealant to fill the gap. Refer to *Figure 7* for sealant placement. Refer to Figure A, B, C, or D for gasket dimensions for your specific model.

Gasket type: CR-Series or EPDM-Series made of foam rubber, approximately 2 mm in thick.

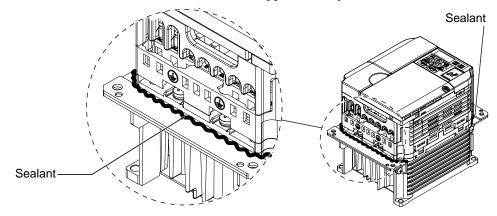

Figure 7 Sealant Placement

Procedure 5 (Enclosure: NEMA Type 1)

- 1. Remove Drive Covers and Brackets
 - **a.** Remove the Terminal Cover.
 - b. Remove Top Cover.
 - c. Remove NEMA Type 1 Cover.
 - d. Remove Conduit Bracket.

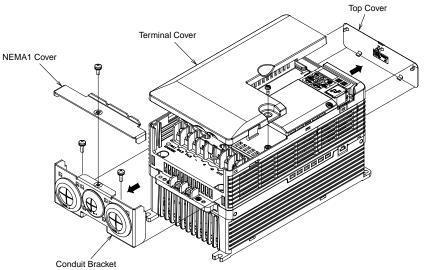

Figure 8 Drive Cover and Bracket Removal

2. Install Attachments 1 and 2

a. Install Attachment 1 and Attachment 2 to the mounting holes on the side of the heatsink using M5 x12 pan-head screws as shown in *Figure 4*.

Drive Model	Installation Fasteners			
CIMR-V□2□0030 to 0056 CIMR-V□4□0018 to 0038	M5 x 12 Pan-head Screws (x4)			
CIMR-VD2D0069	M6 x 14 Pan-head Screws (x4)			

Table 7 Installation Fasteners by Model for Figure 4

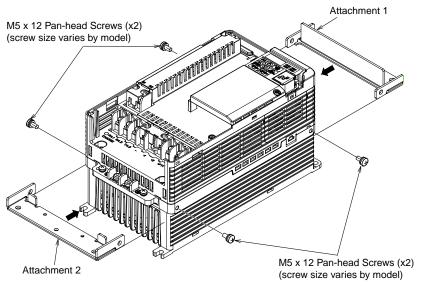

Figure 9 Diagram shown for Model CIMR-VD2D0030

3. Install Attachment 3

a. Install Attachment 3 to the mounting holes of Attachment 1 and Attachment 2 using M4 x10 pan-head screws.

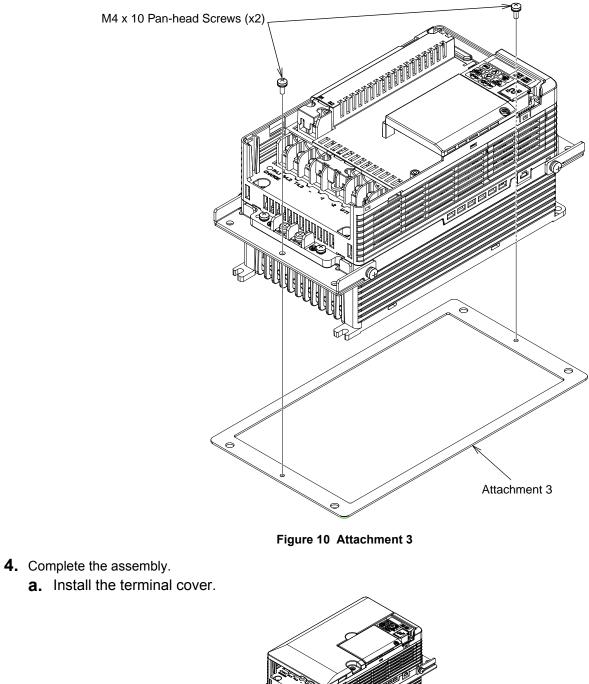

Figure 11 Completed Assembly

Optional Gasket or Sealant (Procedure 5 NEMA Type1 Enclosure)

Note: Gasket or sealant is customer supplied.

If an undesirable gap is found between Attachments 1, 2 or 3 and the drive, attach a CR-Series or EPDM-Series gasket to the mounting panel surface or apply sealant to fill the gap. Refer to *Figure 12* for sealant placement. Refer to *Figure 13* for gasket dimensions.

Gasket type: CR-Series or EPDM-Series made of foam rubber, approximately 2 mm in thick.

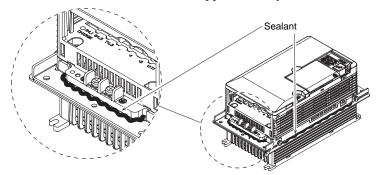

Figure 12 Sealant Placement
